Method of application

The surface to be bonded must be free of dust, grease or any other contaminants. Certain materials such as polycarbonate can cause bubbling problems. A compatibility test is therefore recommended. Possibility of placing on plexiglass and polycarbonate.

Production monitoring and standards

In order to constantly improve our productions, we may have to modify the colors and manufacturing processes without notice. We recommend that our users, before applying our films, ensure that they are exactly suitable for the intended use and that they comply with the standards in force.
