ABOUT US

TeckWrap originally began as a vision and passion of Charles Heidenreich from Baltimore in the USA, and it started developing fast since then. Up until now, TeckWrap has built up a professional dealership network around the globe.

Our mission is to offer customers a wide variety of quality, affordable, and durable vinyl films worldwide. And we have warehouses in different spots including the USA, Germany, Russia, and China, to make sure that our products can reach clients' hands within the minimum time.

Every single year, TeckWrap actively participates in various relevant fairs around the globe, including SEMA (based in the US) and FESPA, gathering international wrapping masters and wrapper groups. More than that, TeckWrap has spread its wings over different festivals and shows, including the ISA, Wrapscon, and Wrapping World, presenting unique and trending films.

Throughout those opportunities, TeckWrap continues meeting up with old and new clients by presenting, demonstrating wrap shows, explaining the process of film wrapping to customers. And some have been loyal enough to become one of our partners.

And this is one of the most valuable experiences for TeckWrap. Our mission is to work with distributors and customers, making peaceful and beneficial cooperation. Most of all, we grow together in this way. These experiences build up strong relationships with our partners. And helping each other friendly is what we especially value.

In comparison with other brands, TeckWrap might seem smaller. However, this is exactly why TeckWrap can always be flexible and efficient. We act as we think, and we seize every chance to reach out to every possibility to give our customers a unique and tremendous experience.

Bear our mission in mind; we are also devoted to keeping up with new trends so that customers can always find what they need with us. We offer vinyl films with an average three-year lifecycle and maintain a strategy of launching brand new designs every quarter as we believe color-change films are fashion products. The market tends to change quickly.

When TeckWrap first started, we had our first product line with the 180 series, where the colors of products are simple yet attractive. It is an ideal choice for partial application. Later on, we have our 190 series explicitly developed for full car wrapping, which has been growing and growing, as well as drawing interest from clients around the globe since it first launched the chrome and metallic products in 2015.

In the coming future, TeckWrap will continue developing its network, and in the meantime, focusing on expanding in printing media and paint protection film. Even more, we will be establishing more warehouses around the world so that we can always be available to our partners and closer to our customers.

TeckWrap is genuinely excited to offer you limitless possibilities to create fashionable, stylish exterior designs with different colors and finishes. Get in touch and feel the difference today.
